

trailerCam™

Digital 7"

Reliable and interference free horse transport overview

Robust and wireless wide-angle camera enables overview in all types of horse transports and in all types of light conditions. Unique transmission technology guarantees a sturdy picture free from interference. In addition, an extra antenna is included. The antenna can be placed 2 m from the camera to get the best possible broadcast.

Complete package, easy to install and easy to use! Safety for both you and your horse. Suitable also for larger horse transports.

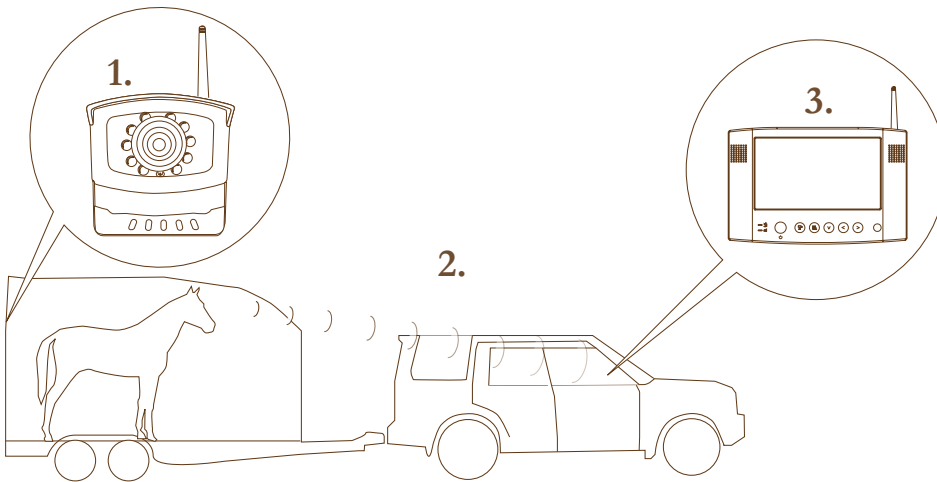

The trailerCam™ wide angle lens covers several horses in the same picture.

Clear and sturdy picture on the 7" LCD-screen in all conditions.

How it works:

Step by step:

1. The camera is mounted in the horse transport.
2. Wireless transmission of the picture without interference.
3. A 7" LCD-screen provides you with a perfect overview of your horse.
